

SALMON & IBM WEBSHERE – A PERFECT PARTNERSHIP

Salmon is a global digital commerce consultancy that delivers market-changing ecommerce solutions for the world's leading organisations.

We've supported more than 120 client implementations on IBM WebSphere Commerce, with 800+ individual release deployments. And counting...

We have a strong relationship with IBM that dates back 15 years. Here's a sample of our WebSphere track record.

We run the **largest** IBM WebSphere Commerce practice in Europe

We build platforms for the **biggest brands** such as Argos, Audi UK, Halfords, Selfridges

Winner of multiple **WebSphere awards** incl. Industry Solutions, Online Retail, and Beacon awards.

We created the world's **biggest B2B** platform for Premier Farnell

We developed the world's **largest online grocery** re-platform for Sainsbury's

Today we're creating the **biggest fashion retail** platform for YOOX NET-A-PORTER Group

Salmon is platform agnostic, supporting a variety of commerce platforms for enterprise-scale clients. But it's our deep experience with IBM WebSphere that sets us apart.

"We looked at a number of platform options and we ended up with IBM WebSphere Commerce and Salmon, simply because they are the best in Europe from the point of view of delivering WebSphere as a platform."

Russell Harte – Head of Multichannel Development & Delivery

"It's taken Sainsbury's 14 years to reach £1bn annual sales online and this new WebSphere platform gives us the capacity to double this. Salmon has been a key partner in helping us transform our digital offer, managing the overall programme and more than ten third parties."

Jon Rudoe – Digital and Technology Director

PLATFORM	IBM WebSphere	intershop®	Magento®	SAP Hybris (v)
CLIENT IMPLEMENTATIONS	120+	75+	12+	70+
